

# Non-Contact Mapping Conference - Advanced Class

Answering the Non-Contact Mapping Questions in Electrophysiology from Fundamental to Advanced.

February 20, 2011 – Sky Lounge, 15th Floor, Capital Hotel, Taipei, Taiwan

## COURSE OVERVIEW

Electrophysiologists today face many important questions. This intensive whole day workshop is designed to provide instruction on the safe and effective use of electrophysiology products while presenting the latest techniques and maneuvers in electrophysiology in a highly interactive format. This program depends on the active participation of electrophysiologists who will work with key opinion leaders on such topics as **the** diagnosis, catheter ablation, pacing maneuvers and troubleshooting in **the** Non-Contact mapping navigation in current clinical practice.
