

Contents

Opening Address	1
Hiroaki Masuzaki	
Lectures (Oral Presentation)	
1) Molecular mechanisms on unsatisfied brain in obesity	2
Shiki Okamoto, Yasuhiko Minokoshi and Hiroaki Masuzaki	
2) Analyses of clinical implication of plasma xanthine oxidase activity in patients with type 2 diabetes mellitus and metabolic syndrome	6
Sumito Sunagawa, Takashi Shirakura, Noboru Hokama et al.	
3) Potential as a biomarker of plasma xanthine oxidase activity in the course of chemotherapy and hematopoietic stem cell transplantation of hematological malignancies	9
Noboru Hokama, Takashi Shirakura, Sumito Sunagawa et al.	
4) Impact of alkalization on metabolic syndrome induced by carnivore excess and vegetable shortage in experimental rat models	13
Satomi Yamasaki, Takashi Kanda, Toshitake Hirai et al.	
5) Association between plasma xanthine oxidoreductase activity and vascular endothelial dysfunction	16
Shio Yoshida, Masafumi Kurajoh, Shinya Fukumoto et al.	
6) The association between xanthine oxidoreductase activity and serum uric acid level	19
Masafumi Kurajoh, Shinya Fukumoto, Takayo Murase et al.	
7) Plasma xanthine oxidoreductase activity in Japanese Type 2 Diabetic Patients and morbidly obese patients who underwent bariatric surgery	22
Yusuke Kawachi, Yuya Fujishima, Takayo Murase et al.	
8) Visceral fat area relate to glucose, lipid and uric acid metabolism, regardless of visceral fat accumulation	25
Ryohei Mineo, Yoshito Itoh, Ryuya Iwamoto et al.	
Special Lecture	
Metabolic syndrome, Adiponectin, and Hyperuricemia	33
Ichiro Shimomura	
Closing Remark	40
Yuji Matsuzawa	
Closing Address	43
Hiroaki Masuzaki
